

Installation instructions

Instructions d'installation

Arc 80 | Max 10W LED integrated, 220-240V

Arc 130 | Max 19W LED integrated, 220-240V

English

Warnings

- Consult a licensed electrician before wiring to the ceiling.
- Install in a location that has plenty of room around the light.
- Keep away from direct sunlight.
- Maintain at least 12in (31cm) between the lamp and canopy.
- The low voltage wires are coloured differently: brown being positive (+), blue being negative (-).

Before installing

Disconnect power: Use voltmeter to verify that there is no voltage present on the switch wire.

Tip: Hang a card in the fuse box so no one accidentally turns on the power.

Check with a cable locator if there are no electrical lines running through the spot where you want to drill. Otherwise there can be a risk of short circuits.

Français

Avertissement

- Consulter un électricien agréé avant de câbler au plafond.
- Installer dans un endroit qui a beaucoup d'espace autour de la lumière.
- Tenir à l'écart de la lumière directe du soleil.
- Maintenir au moins 31 cm entre la lampe et la rosace.
- Les fils basse tension ont des colorations différentes: le marron est positif (+), le bleu est négatif (-).

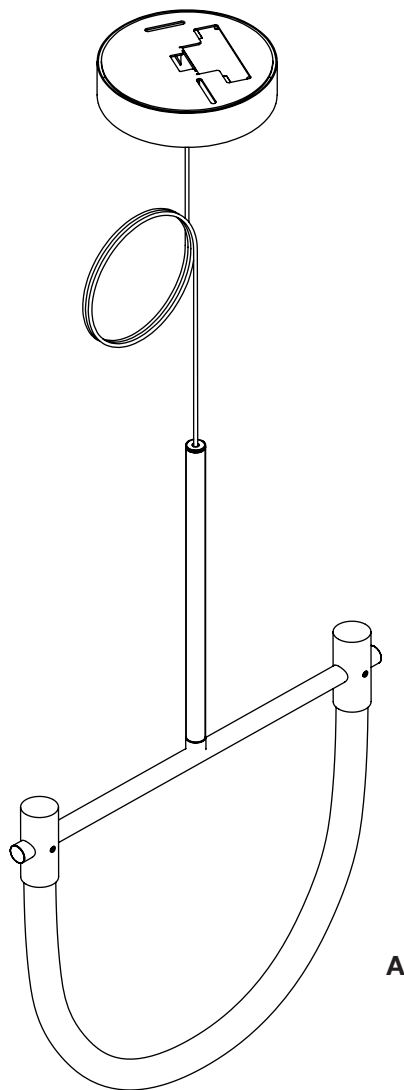

Avant l'installation

Déconnecter l'alimentation: Vérifier à l'aide d'un testeur que le courant est bien coupé en sortie des fils d'alimentation.

Astuce: Accrocher une carte dans la boîte à disjoncteur divisionnaire afin que personne n'allume accidentellement le courant.

Vérifier avec un localisateur de câble s'il n'y a pas de fils électriques qui traversent l'endroit où vous voulez percer. Sinon, il peut y avoir un risque de court-circuit.
