## Charging base

The charging base can wirelessly charge a Wick pro.

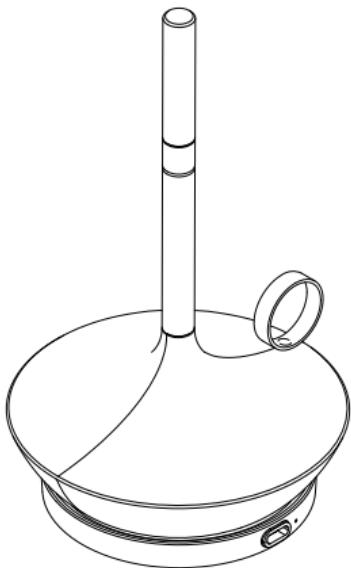

It features a light indicator to show whether it is charging or not. The light turns green when the Wick pro is fully charged.

## Components

### Included in the package:

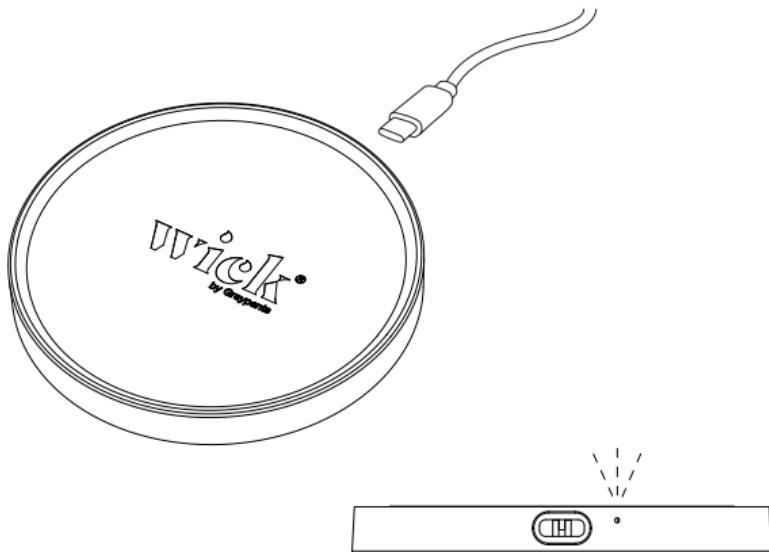

- Wick Pro charging base
- Wick Pro wireless Instruction manual

## Charging base setup

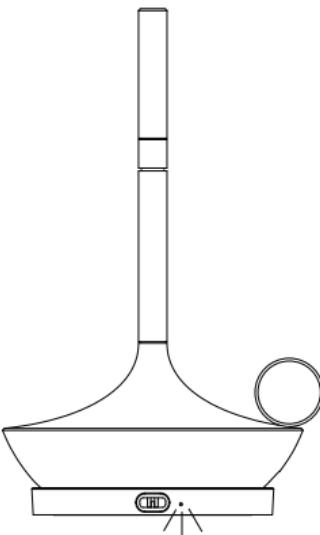

The charging base can be plugged into the powergrid using a USB-C connection.

## Charging base assembly

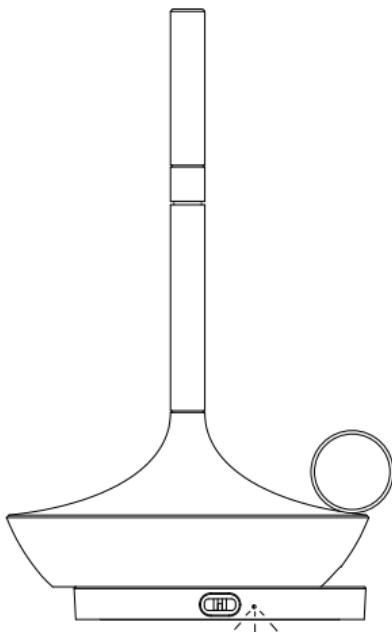

Plug the USB-C cable into the charging base and into the powergrid, the light next to the USB-C port will flicker three times when it is turned on.

## Wick interaction

To charge a wick pro, place it on the charging base. The light of the charging base will turn on. When the lamp is fully charged, the light will turn green.

The green light will flash if the charger detects a foreign object or if there is poor aligning with the wick pro.

## **Maintenance**

Clean the product using a dry microfiber cloth, be mindful of water and chemical usage.

Do not get it wet.

Do not damage the circuit parts.

## **Safety Instructions**
